

# WHY CONTAINERS ?

IThinkpark, 20.10.2017

Dr. Roland Huß, Red Hat, @ro14nd

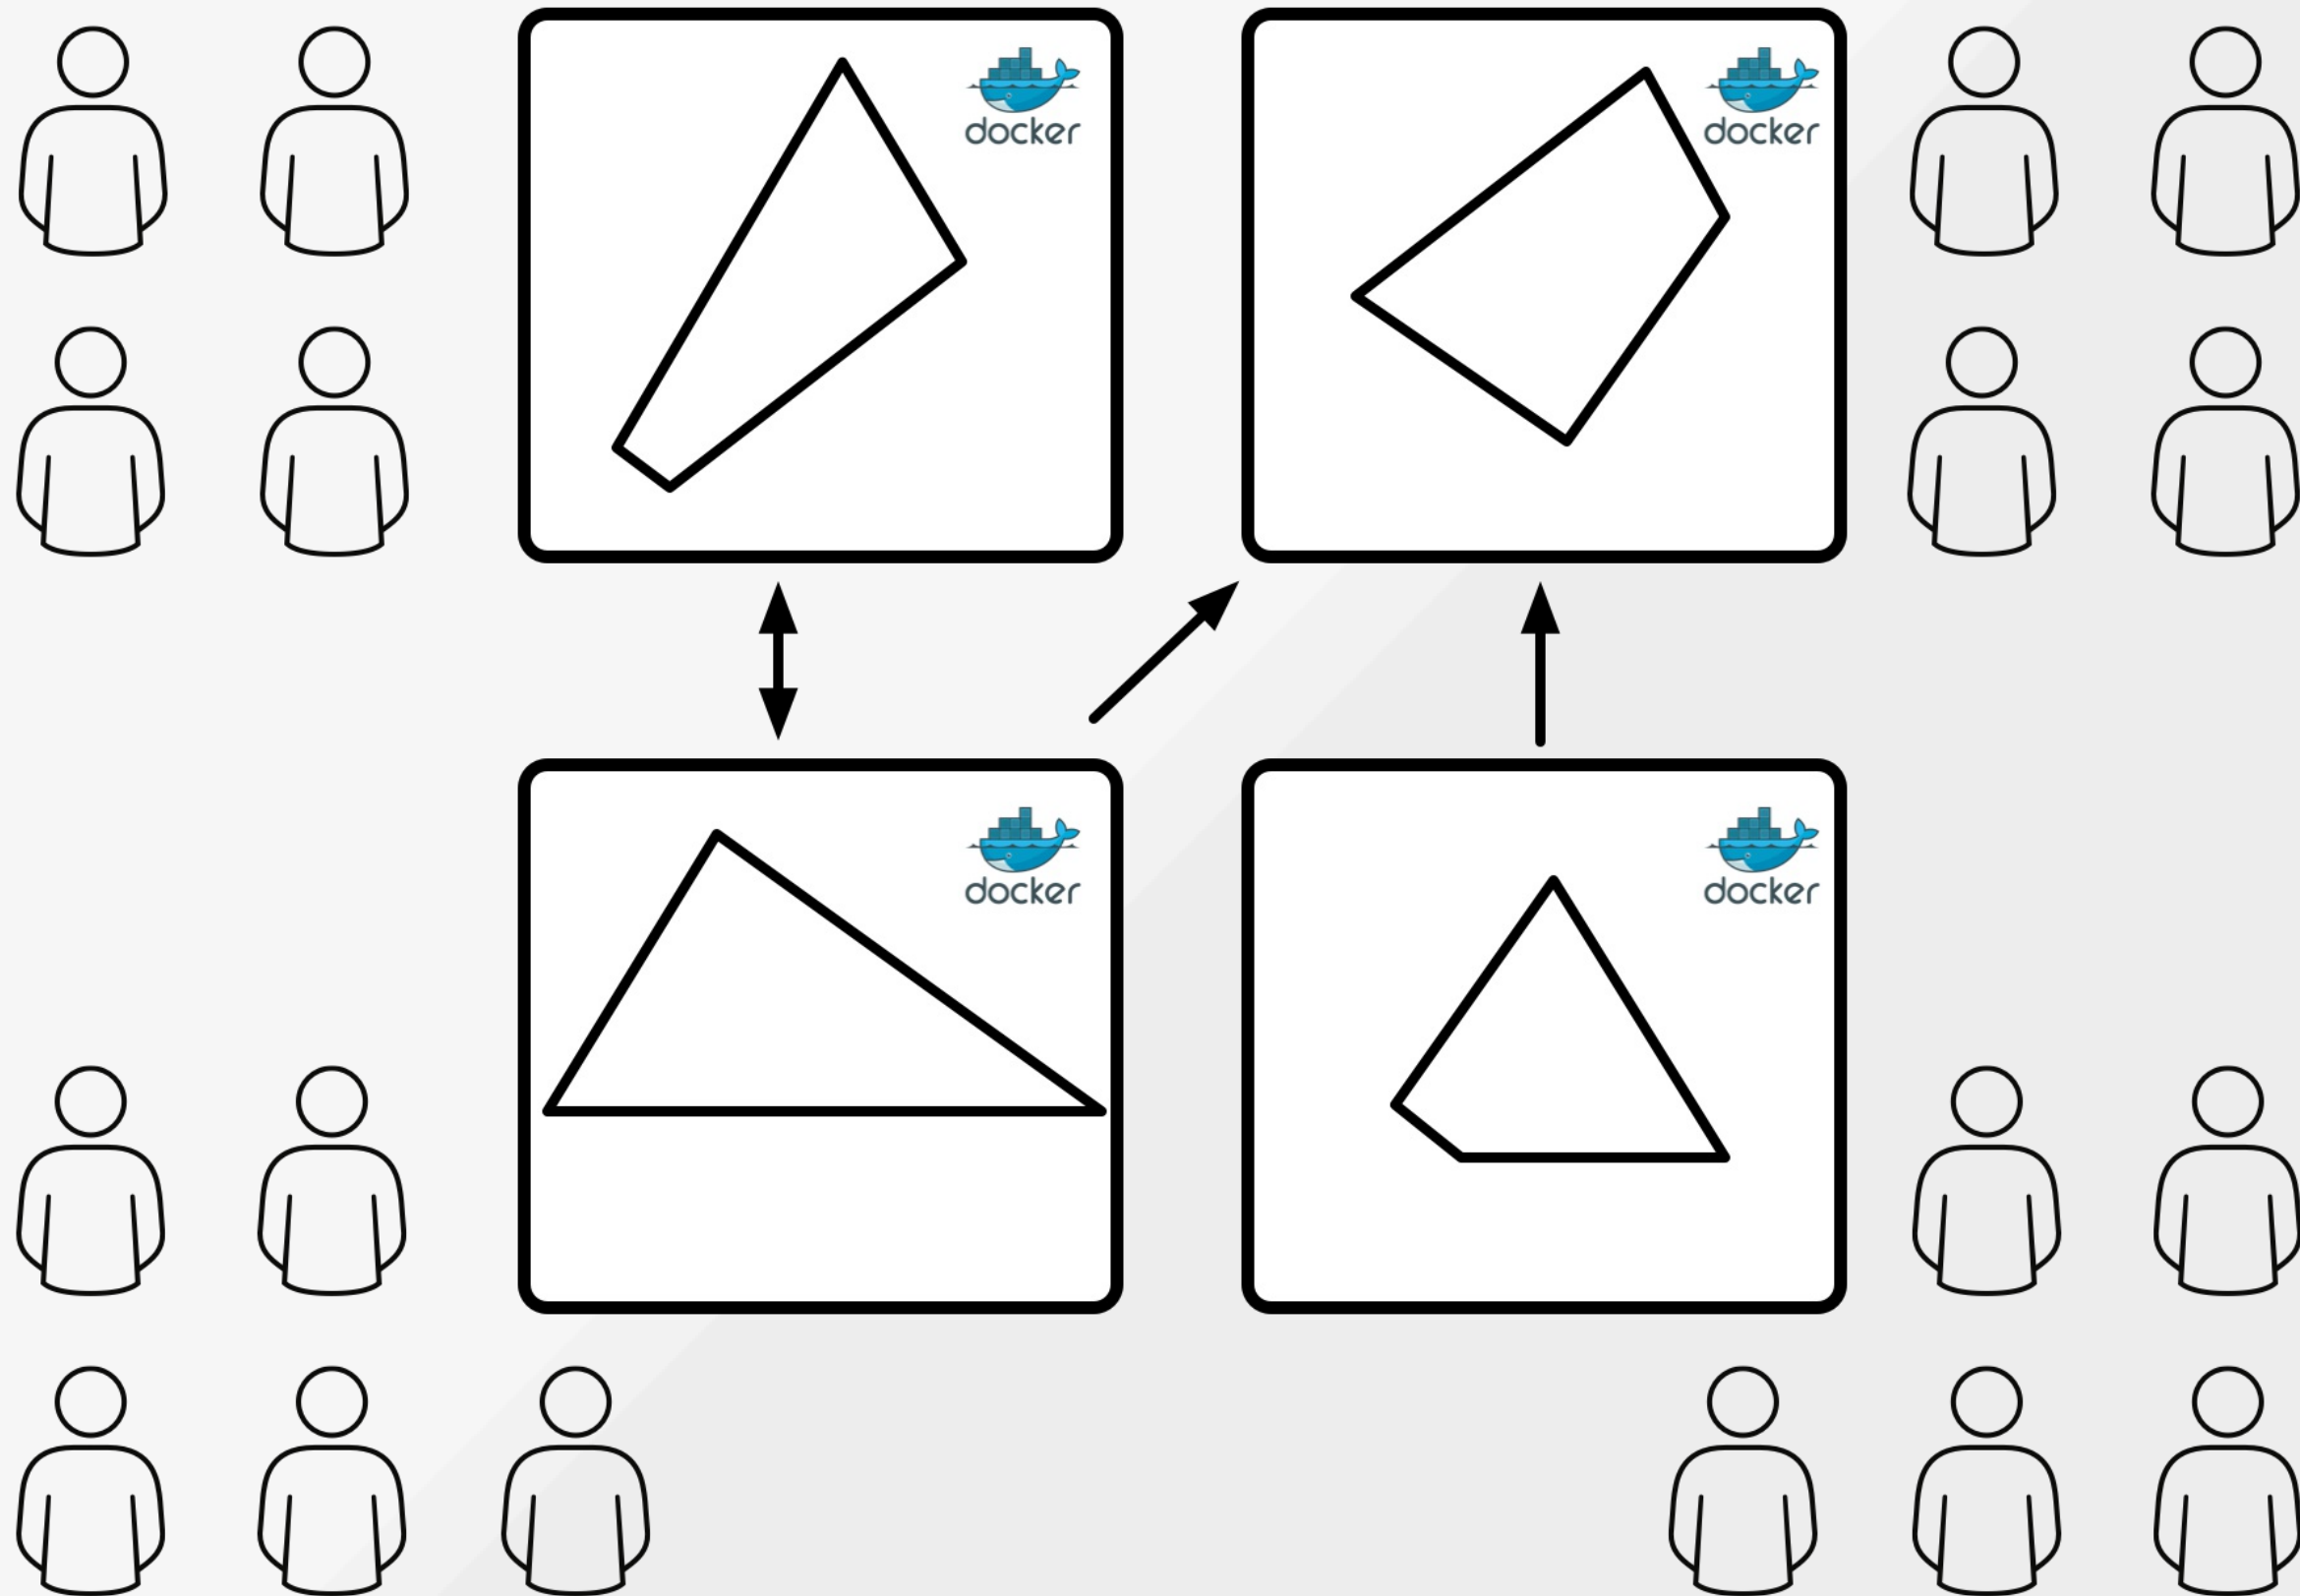

# VM VS. CONTAINER

Containers are **isolated**, but share the kernel and (some) files  
➔ **lighter** and **faster**

# docker

# DOCKER

- Open-Source project backed by Docker Inc. (since 2013)
- Tools for managing containers
- Image format definition
- Sharing via registries
- On top:
  - Docker Compose
  - Docker Swarm

# KUBERNETES

- Open Source orchestration system for containers
- Started by Google in 2014
- Features:
  - Scheduling
  - Horizontal scaling
  - Self-healing
  - Service discovery
  - Automated rollout and rollbacks

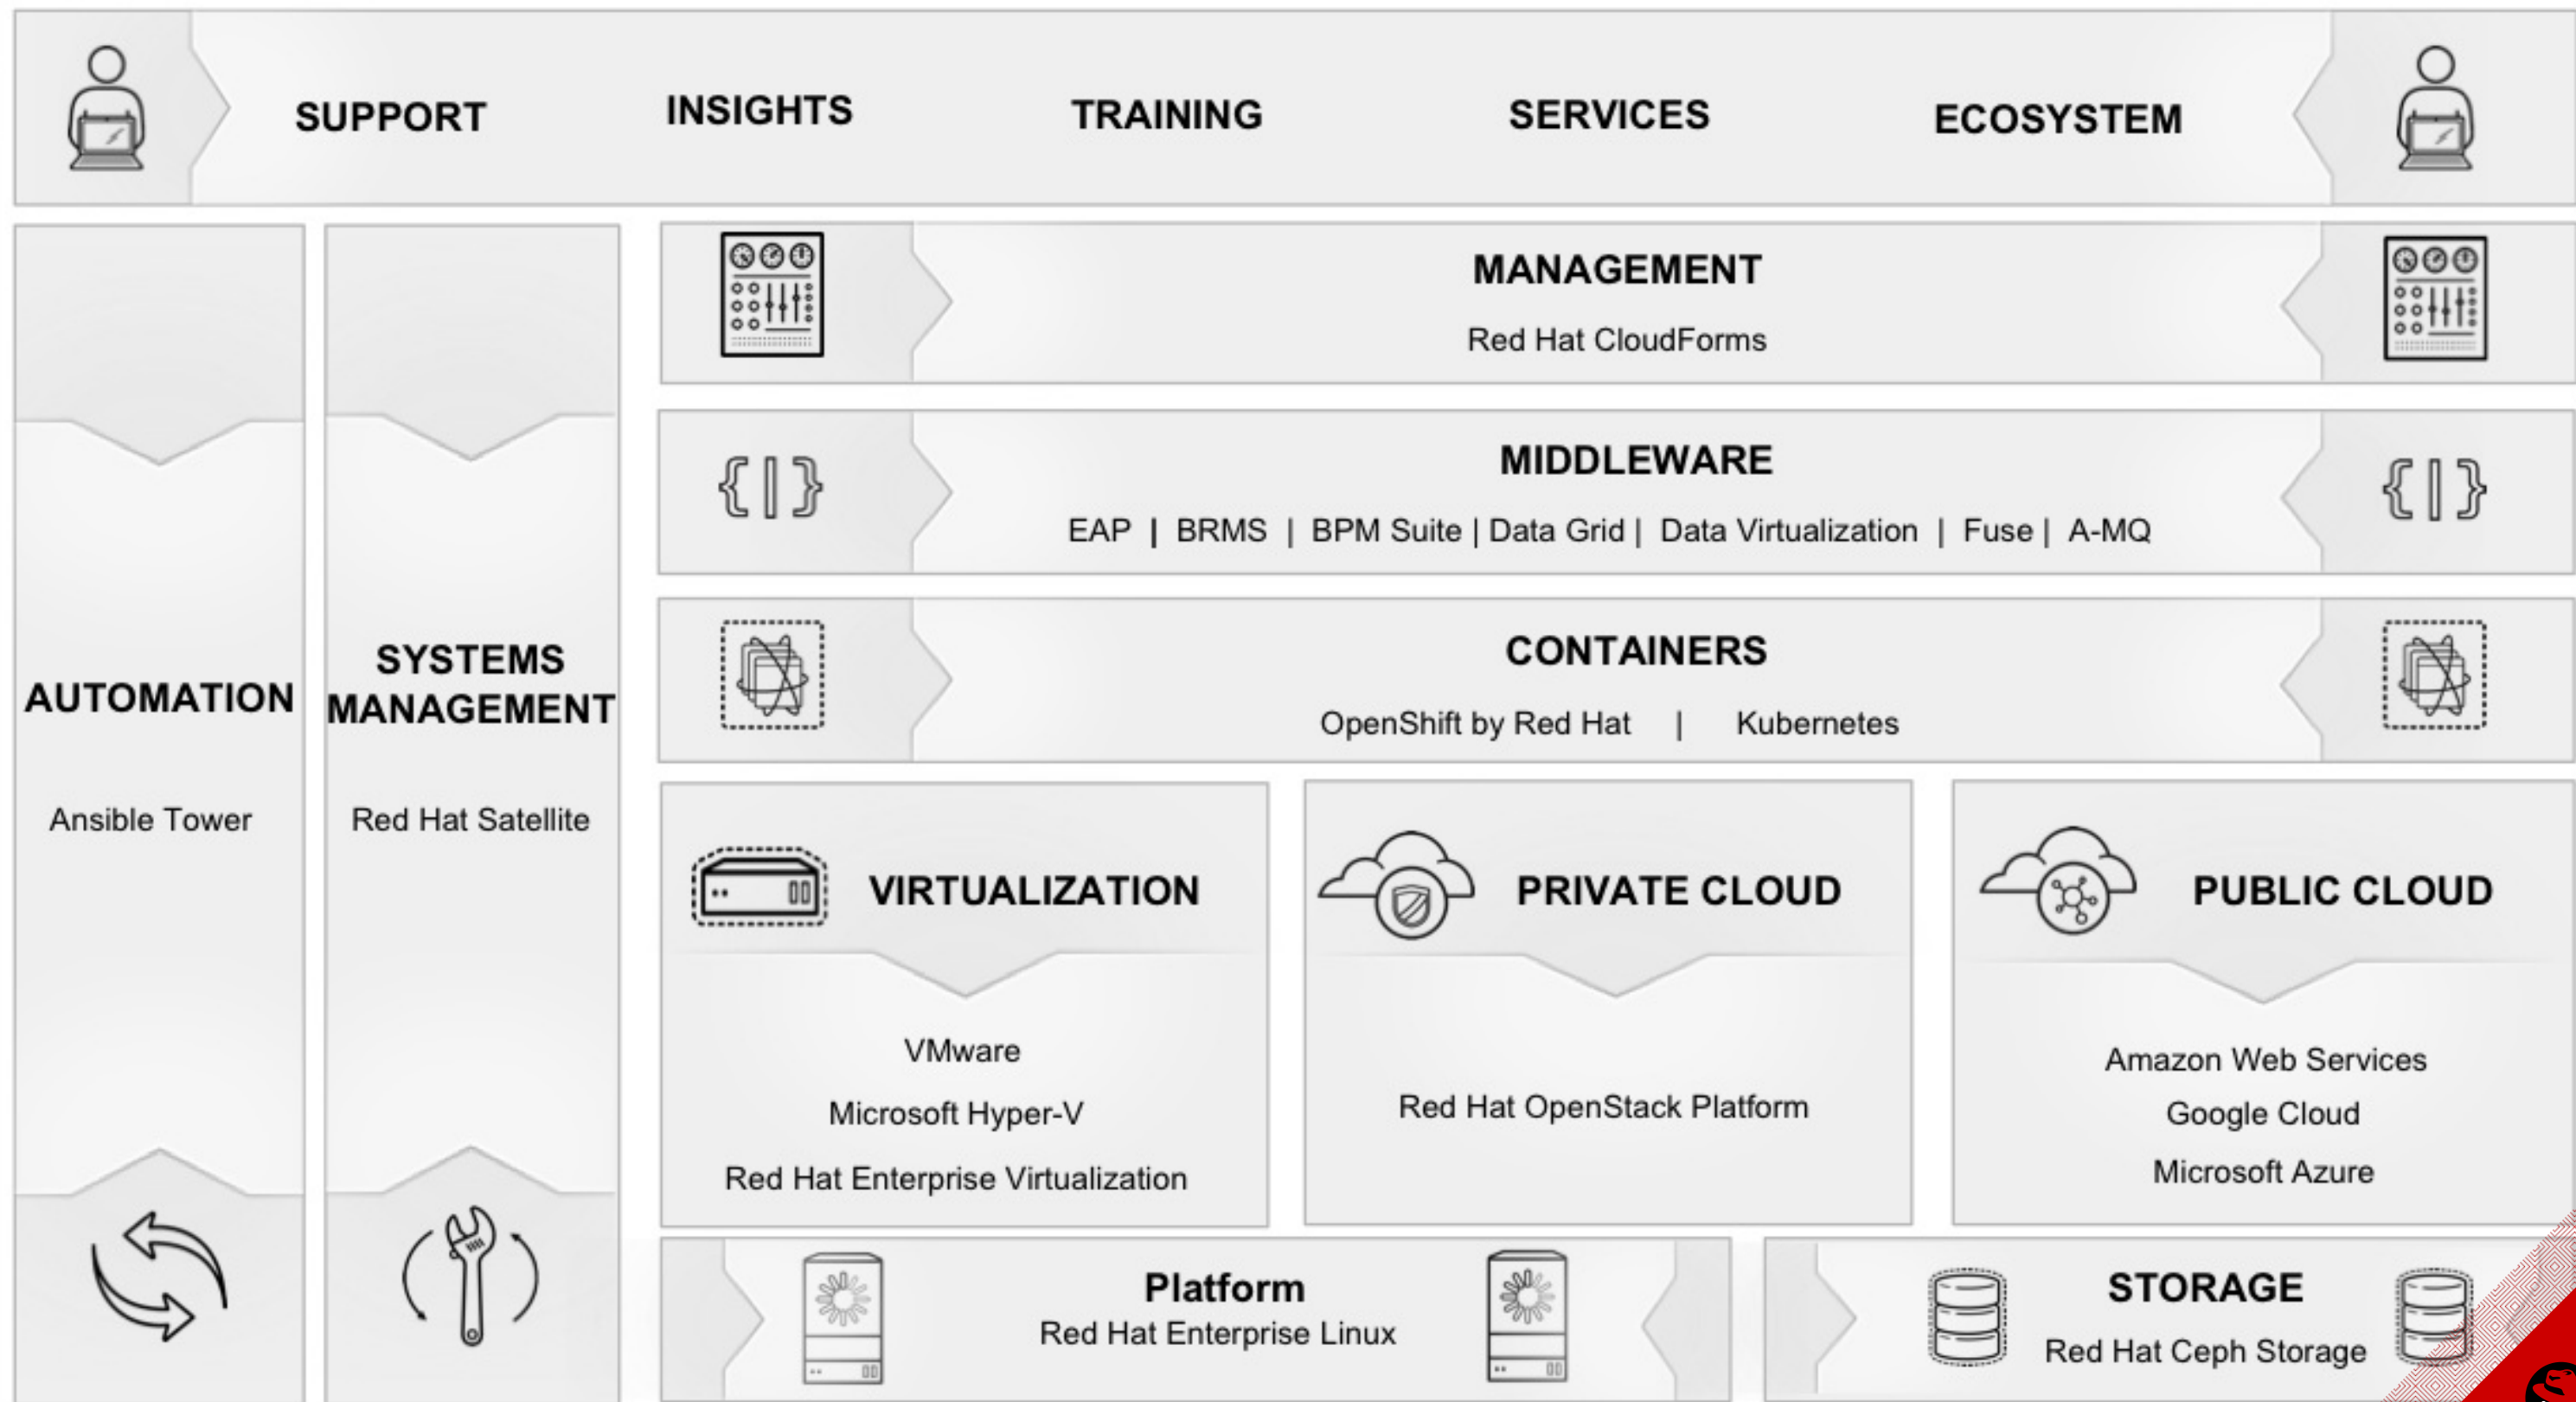

# OPENSHIFT

# OPENS SHIFT

- Adds the **BUILD** to Kubernetes
- Developer and Operation Tools
- Infrastructure Services
  - Registry, Router, OAuth2 Security
- Volume Management
- Multi tenancy
- Management UI

# ARBEITSINSEL

Wie kann ich Java Anwendungen  
containerisieren ?
